

Success Stories

Technology Development:

Project initiated in collaboration with consortium of public sector (oil gas and energy) companies. 60% of the project budget is being funded by the consortium. After the completion of the project, the active members of the consortium will take up the IP generated for commercialisation.

Agriculture projects are being conceived and implemented in collaboration with ICAR(Onion, Grapes & Cotton).
Ayur Covcare App and Smart Health Monitoring terminal developed and testing is under progress on various patients

Human Resource Development:

Fellowships linked with projects based on industry problem statements. Projects to be executed by the team of students from different streams and different programs. Faculty members and industry mentors to hand-hold the students during the project. The IoT course completed for three batches.

International Collaboration:

India- US collaborative research program in partnership with National Science Foundation, USA. TIH fund India researchers and US programs fund US researchers & entities. Joint identification of topical areas for collaborative research proposals. Building collaboration workshop in partnership with NSF and IUSSTF.
