

# ARTPARK Innovation Summit 202

## Event Report

AI & Robotics Technology Park (ARTPARK) promoted by IISc and supported by AI foundry has organised the ARTPARK Innovation Summit on 14th March 2022. The one-day hybrid event, themed “Connecting the Unconnected” building a smart, sustainable rural economy, took place at the historical Faculty Hall, IISc, Bangalore.

The summit brought **industry**, **academia** and the **government** under one roof to discuss important topics like: how to create next-generation connectivity in rural areas, Health AI for Bharat, Connecting Bharat with Drones, Inclusive learning for future and building AI and research ecosystem.

The following is a short summary

30+ Speakers	17 Innovation & Startup Showcase	120 In-person Attendees	1400+ views on Live Stream	160 + Press coverage	58K + organic impressions on socials & YouTube
-----------------	-------------------------------------	----------------------------	-------------------------------	-------------------------	---

<a href="#">Learn more</a>	<a href="#">Learn more</a>	Speakers & Delegates	>14th March 560 views >On-demand video 700 views	Click <a href="#">Here</a> for coverage <a href="#">18 Print Coverage</a> clips	From 5th to 15th march
----------------------------	----------------------------	----------------------	---	---	------------------------

The summit thoroughly embraced the theme of '**Connecting The Unconnected**' to a build smart, sustainable village economy. For it is only when the digital and physical realms are connected intelligently and robustly, that unimaginable opportunities can be unlocked. AI and Robotics can be harnessed powerfully and dramatically to reshape every sphere of human endeavour: especially transportation, education, employment, and the creation of smart, sustainable villages.
